

## ROAD SAFETY AUDIT – WAGGA WAGGA

### Project Background

Spotto Consulting recently completed a Road Safety Audit for the City of Wagga Wagga.

The City of Wagga Wagga wants to improve the condition of several roads and intersections on the fringe of the Wagga Wagga CBD.

As part of developing options for improvement, a Road Safety Audit was commissioned by Council to enhance understanding of the existing conditions.

### The Spotto Consulting Approach

A Road Safety Audit is a formal examination of an existing road, in which an independent, qualified team reports on the road's crash potential and safety performance. Working with Council and our industry partners, we completed the essential requirements of the audit process, including meeting relevant stakeholders, undertaking day and night time inspections, and preparing a written report.

Our approach focussed on identifying a range of hazards to motorists, cyclists and pedestrians. The level of risk of each hazard was evaluated, and hazards were then grouped into common areas. A formal report documented the investigation and extent of hazards, which were discussed in detail with Council (including identifying opportunities to deal with the hazards).

### The Outcome

Spotto Consulting's formal report documents the hazards identified, which allows Council to consider these along with other constraints in developing options for improving the roads. The formal report can also be used to assist Council in supporting applications to secure funding for upgrades.

### Spotto Consulting

Spotto Consulting is an independent firm with expertise in traffic engineering, transport planning and road safety. Our focus is on solutions that are people-oriented.
